

MATLAB manual

As you can get a free license for Matlab, we provide you a description of the download, registration, and installation here. The source of information in the ZIMT department which is responsible for various different tools and software. Thus, more information (in German) can be found on:

https://www.zimt.uni-siegen.de/beratung_und_lehre/software/matlab_student/index.html

Students of the University of Siegen can use the software on their computers (max. 2) for their studies. A commercial use is not allowed. The license has to be renewed once a year.

The software can be downloaded e.g. via the university's network (on Site, VPN): ftp://ftp.uni-siegen.de/lokales/MathWorks/MATLAB/Student_Campuslizenz/

Further, you have to create an account at MathWorks with the email address from the university and download the software directly: <https://www.mathworks.com/>

The next step is the installation. Here, you can activate the license by entering the activation key. The ZIMT provides a guide on the installation here. The German comments can be disregarded as everything should be explained by the pictures.

https://www.zimt.uni-siegen.de/beratung_und_lehre/software/matlab_student/matlab_kurzinstallation.pdf

You get the key following the link, once you agreed on the terms of the license.

https://cas.zimt.uni-siegen.de/cas//login?service=http://www.uni-siegen.de/zimt/beratung_und_lehre/software/matlab_student/cas.xsp?ok=%26submit=

In case of problems you can contact your MEPS advisor via: meps@uni-siegen.de or directly the user service of the ZIMT department.
