

Siegen City Tour 2021

As, unfortunately, last year's welcome days had to be conducted online we were happy to be able to offer a tour through the "Oberstadt" of Siegen complementing the online information meetings.

We visited the castle campus as the main point of studies due to the location of lecture halls for courses in economics, the library and the newly opened canteen. Further, the students could count on our tutors Umidjon Khoshimov and Violeta Prykhodchenko to share their experience of the previous years with them. Umid remotely prepared the students for their upcoming life in Germany from his home country on the day before. During the tour, Violeta kept the students excited with stories she could tell about the city of Siegen and Germany in general. At the same time, we discovered the old town, the town hall, the lower castle and the upper castle with its beautiful garden.

It is a pity that not all new students could join us yet but we are planning further events for the future where all of us can finally meet up.
